### **SANJAY BHATIA, IAS**

Vice Chairman & Managing Director, CIDCO

#### **Zero Corruption – 100 % Town Development**

Public services must uphold the highest standards of integrity, ethics, transparency and accountability. Corruption is the abuse of entrusted power for private gain and it hurts everyone who depend on the integrity of people in positions of authority for delivery of good services.

Corruption is a global phenomenon that strikes the poor, the hardest, hinders inclusive economic growth and robs essential services of badly needed funds. From cradle to grave, millions are touched by the shadow of corruption.

To dent this problem, I urge every citizen to report corruption.

This webpage has been created for reporting corruption in CIDCO. The unique feature of this webpage is that such complaints received will be made public after masking the identities of complainant (for his/her protection) and the public official of CIDCO (for protection against reputation loss in case the complaint is false). It is hoped that this transparency in complaints of corruption will act as its own check against corruption and will make for a clearer public service system at CIDCO.
